Nuclear Engineering and Design 171 (1997) 193

Nuclear Engineering and Design

Subject Index of Volume 171

Engineering mechanics

US Nuclear Regulatory Commission research for primary system integrity regulations
C.Z. Serpan, Jr., M.E. Mayfield, J. Muscara 171 (1997) 1

Materials properties

Evaluation of ductile tearing in cracked pipes and elbows under bending
D. Moulin, G. Clement, B. Drubay, G. Goudet 171 (1997) 33
Manufacturing and material properties of forgings for the reactor pressure vessel of the high temperature engineering test reactor
I. Sato, K. Suzuki 171 (1997) 45
Cracking in stabilized austenitic stainless steel piping of German boiling water reactors—characteristic features and root cause
M. Erve, U. Wesseling, R. Kilian, R. Hardt, G. Brümmer, V. Maier, U. Ilg 171 (1997) 113
Assessment of aging of Zr-2.5Nb pressure tubes in CANDU™ reactors
M.P. Puls 171 (1997) 137
Essential results of analysis accompanying the leak rate experiments E22 at HDR
H. Grebner, A. Höfler, H. Hunger 171 (1997) 149
Investigations into the ratchetting behaviour of austenitic pipes
D. Krämer, S. Krolop, A. Scheffold, R. Stegmeyer 171 (1997) 161
Effect of cladding on the initiation behaviour of finite length cracks in an RPV under thermal shock
J.G. Blauel, L. Hodulak, G. Nagel, W. Schmitt, D. Siegele 171 (1997) 179

Mechanical design, component fabrication and testing

Evaluation of piping damage in German nuclear power plants
K.W. Bieniussa, H. Reck 171 (1997) 15
The basic concept to ensure the integrity of components during operation
W.G. Hienstorfer, J. Bartonicek, H. Kockelmann 171 (1997) 57
Replacement of safety-related valves in Philippsburg 1 nuclear power plant
H. Wolf 171 (1997) 67
Tests for the dynamic behaviour of isolation valve cone screws
K.-D. Tulke, W. Stoppler, G. Stern 171 (1997) 75
Nondestructive characterization of materials A growing demand for describing damage and service-life-relevant aging processes in plant components
G. Dobmann, N. Meyendorf, E. Schneider 171 (1997) 95
Planned and implemented remedial measures to prevent IGSCC and to ensure safe plant operation with BWR piping systems made of stabilized austenitic steels
M. Erve, G. Brümmer, U. Kleen, V. Maier, U. Ilg, H.J. Bäumler, A. Seibold, D. Blind 171 (1997) 125
Analysis of Novo-Voronezh NPP unit 3 radiation lifetime of the WWER-440 reactor pressure vessel given samplings
V. Kiselyov, A. Korinets, Y. Maksimov, V. Piminov 171 (1997) 173
Effect of cladding on the initiation behaviour of finite length cracks in an RPV under thermal shock
J.G. Blauel, L. Hodulak, G. Nagel, W. Schmitt, D. Siegele 171 (1997) 179

Nuclear safety

US Nuclear Regulatory Commission research for primary system integrity regulations
C.Z. Serpan, Jr., M.E. Mayfield, J. Muscara 171 (1997) 1

Reactor concepts and systems analysis

The basic concept to ensure the integrity of components during operation
W.G. Hienstorfer, J. Bartonicek, H. Kockelmann 171 (1997) 57
